

Quality Management System Development

CREATE A NIMBLE REPORTING PLATFORM TO IMPROVE COMPETITIVE ADVANTAGE

Partner

A Fortune 100 industrial manufacturer

- Component manufacturing division

Challenge

Key stakeholder buy-in on common restructuring key performance definitions and indicators

- Time-frame to conduct workshops with maximum attendance
- Creation of user-friendly tools and templates to capture information
- Build an end-to-end data flow platform
- Manage metric owners to provide data in sync with client cadences
- Controlling changes formed by the continuously evolving processes

Objective

Develop standard restructuring key performance indicators and definitions to establish a foundation program progress

- Create a central database framework to collect, store, cleanse, and analyze data to generate automated reports, driving execution and visibility towards overall risk
- Host a series of workshops to integrate nimble reporting platform across the division

Solution

Collaborate with stakeholders to define relevant key performance indicators, reflecting the status of the new platform

- Create tools and templates that could be accessed by the metric owners to be periodically updated
- Create platform connecting disparate data sources
- Develop dashboards using data visualization tools to showcase monitored programs
- Deploy a customized central governance reporting process
- High focus on the bottlenecks of the entire supply chain network
- Train stakeholders on platform use and process

Transformation

- Raised health and risk visibility to 95%
- Better spending efficiency via enhanced transparency on CAPEX and OPEX
- Boosted planning vision via customized automated reports every 30 days
- Opened two-way communication channel, sharing best practices and lessons learned
- 100% data confidentiality through anonymity and restricted access

100% improvement in reporting efficiency, via nimble platform deployment.

executing focused decision making."
